

MOTORISED · FULL-MOTION SWIVEL

MOTORISED WALL MOUNT SWIVEL TV LIFT

One television, every seat. Swings a **43"-100"** TV out from the wall and turns it up to **160°** towards the sofa, the swing or the dining table — by remote, Alexa or Google — then parks it back **near-flush** against the wall.

Extended & swivelled — turned to face the seating zone

01 ONE SCREEN, EVERY SEAT

The AxisY **Motorised Wall Mount Swivel TV Lift** is a full-motion bracket for large flat-panel and curved televisions from **43" to 100"**. A press on the remote — or a voice command through Alexa or Google — and a concealed actuator drives the dual-arm linkage, gliding the screen out and turning it through **0°–160°**.

The same television now serves a sofa, a swing, a dining table or an adjoining space, without anyone touching the panel. Parked, it sits close to the wall in a **near-flush** profile; extended, it reaches **940 mm**. A reinforced steel chassis in premium black powder coat carries up to **45 kg**.

BEST SUITED FOR

Open-plan living and dining rooms, sofa-and-swing layouts, premium apartments, hospitality suites, boardrooms, showrooms and reception areas — anywhere one screen must face several seating zones. Powered movement is smooth, repeatable and removes the strain of swinging a heavy panel by hand.

02 KEY FEATURES

▶ Alexa & Google voice control

Operate it hands-free with Amazon Alexa or Google Assistant through IR control — no remote needed.

▶ Remote-controlled movement

A handheld IR remote extends, retracts and swivels the TV on demand — no reaching, pushing or pulling.

▶ Wide 0°–160° swivel

A broad rotation range lets a single screen serve multiple seating positions across an open layout.

▶ Heavy-duty 45 kg capacity

Reinforced steel arms safely carry big-screen panels up to 45 kg (99 lbs) with minimal flex.

▶ Near-flush parking

Folds back to a tidy near-flush profile and returns to the same rest position every time.

▶ Integrated cable management

Routing channels guide power and AV leads along the arms so cables track the motion cleanly and stay out of sight.

▶ Easy-to-install split panel

Detachable TV rails hook onto the wall plate, so the screen can be offered up and locked in place with ease.

▶ Premium black powder coat

A durable matte finish resists scratches and corrosion and recedes discreetly against any wall.

03 HOW IT WORKS

1

Press to extend

The remote (or your voice assistant, via IR) signals the actuator, which drives the linkage and glides the screen out from the wall.

2

Swivel to the view

Rotate the panel anywhere across the 0°–160° arc to face the chosen seating zone or room.

3

Park near-flush

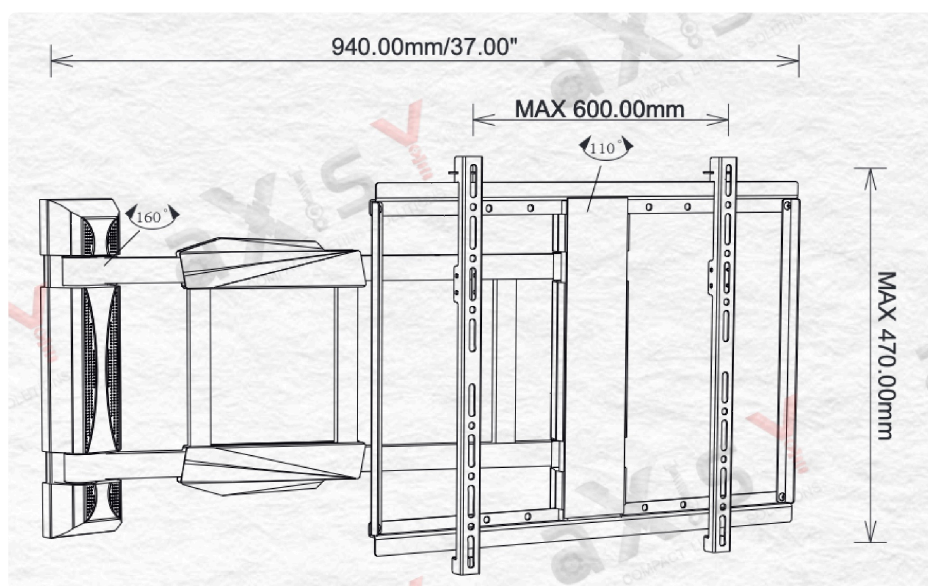

One press returns the arms to the wall, parking the TV in its tidy near-flush resting position.

04 TECHNICAL SPECIFICATIONS

Product type	Motorised wall mount swivel TV lift (full-motion)
Compatible TV size	43" – 100" (55" – 100" recommended for best balance)
Maximum load capacity	45 kg / 99 lbs
VESA mounting pattern	Up to 600 × 400 mm
Max extension (TV to wall)	940 mm / 37.0"
Swivel range	0° – 160°
Mounting-rail width / height	Up to 600 mm wide × 470 mm tall
Operation	Electric motorised actuator; IR remote handset
Voice control	Alexa & Google Assistant, through IR control
Material	Heavy-gauge steel chassis and arms
Finish	Premium black powder coat
Cable management	Integrated routing along both arms
Warranty	Limited 1-year warranty

All figures are nominal maximums. Always confirm your television's actual weight and VESA spacing fall within these limits before installation.

06 DIMENSIONS & GEOMETRY

Top view — extension, mounting envelope and articulation angles

940 mm

Full reach from wall (37.0")

600 mm

Mounting-bar width (VESA)

470 mm

Mounting-bar height

160° / 110°

Wall swivel / panel articulation

07 WHAT'S IN THE BOX

01 Pre-assembled motorised arm unit

03 Pair of adjustable TV mounting rails

05 Power lead / adapter

07 Installation manual

02 Wall mounting plate

04 IR remote handset

06 Fixings & hardware pack (anchors, bolts, VESA screws, spacers)

Typical pack contents — please check against the carton checklist on receipt.

08 INSTALLATION OVERVIEW

1

Confirm a solid wall (masonry / concrete) and fixings suited to the substrate.

2

Mark and bolt the wall plate level using the supplied hardware.

3

Fix the split rails to the TV's VESA points.

4

Hook on the TV, lock it, then route power & AV through the channels.

5

Pair the remote, set open/close limits and test the full travel.

Note: two-person installation is recommended. Professional fitting is advised for 75"+ panels and for plasterboard or hollow walls. Keep the swivel path clear and allow side clearance for the full 160° rotation.
