

Projector Lift

2 Meter Drop

Model No.

AX 202H

Product Details

- Aluminum Scissor Lift
- 2 Meter Drop
- Tubular Motor
- 50 kg Weight Lifting Capacity with Bottom Sheet
- Cable Track For Better Cable Management
- Adjustable Clamps For Lower Plate

**1 YEAR
WARRANTY**

Lift Box Dimension

Weight 20kg

Projector Lift

Projector Lift Installation (Page - 1)

How to calculate Gap between RCC Ceiling to False Ceiling.

For Fixed Lens Projector

A = Lift Height

B = Projector Tilting Space

C = Projector Height

D = Gap Between Projector to Bottom Sheet

E = Bottom Sheet thickness

$$A (\underline{8.7^{\circ}}) \text{ Inch} + B (\underline{\quad}^*) \text{ Inch} + C (\underline{\quad}) \text{ Inch} + D (\underline{\quad}^{\#}) \text{ Inch} + E (\underline{\quad}) \text{ Inch} = (\underline{\quad}) \text{ inch}$$

● = AX 202 H Height

* = Approx 1 to 1.5 inch

= Approx 0.5 to 1 inch

For Lens Shifting Projector

A = Lift Height

B = Projector Height

C = Space

D = Bottom Sheet thickness

$$A (\underline{8.7^{\circ}}) \text{ Inch} + B (\underline{\quad}) \text{ Inch} + C (\underline{\quad}^*) \text{ Inch} + D (\underline{\quad}^{\#}) \text{ Inch} = (\underline{\quad}) \text{ inch}$$

● = AX 202 H Height

* = Approx 1 to 1.5 inch

= Approx 0.5 to 1 inch
